

Dear FCC Commissioners & Staff:

I have been a loyal subscriber to my ISP for 10 years without any service complaints. I get great value and service, and I know that my ISP provides much needed competition for Bell South which would be able to charge higher rates here in Louisville. I am against any manipulation of the free market in general, and specifically, I am against any action which discourages the growth of small businesses. Please don't give the large telecommunications companies the monopoly on broadband communication. Consumers will suffer if you do.

Thank you.

Sincerely,

Lawrence L Simpson, MD
